

West Midlands Cervical Screening Services

Planned IT Changes – HPV Server Migration Update

Dear GP Practice

Following the communication dated 20 May 2020, informing you on the forthcoming HPV Server migration. The testing and assurance of the new server has been completed and the transition to the new server will be on **Tuesday 07/07/2020**.

We expect there to be little or no disruption to the service during this time however you may experience a delay with results coming through to your system on the day, which could be up to 24 hours.

As part of this server update you will notice some small changes to the electronic results message to improve your results management and reporting. This includes:

1. **READ Codes** - Coding of HPV Test

4K55.	Cervical cytology test
43jY1	Hum papill vir DNA dtctn assay

The management of the coded results will need to be updated as part of your local business processes.

2. **Sample Taker PIN** – Sample Taker PIN of who completed the cervical screening test at the GP practice.

What are the changes?

The electronic results are currently sent from Royal Wolverhampton Trust (RWT) Pathology Server to your GP system and this is the current configuration you have set up in your system to receive the results. To streamline our services and support the implementation of electronic ordering for HPV cervical screening tests, we need to move to a dedicated server. As an end user you will see no difference, as we will continue sending the results in the same method but from a different sending system (server). Of course you will need to ensure you have the new server configurations set up in your GP system.

How do I check if the system is configured with the new server?

You should now be routinely receiving cervical screening sample results electronically into GP Practice System, from the current server, which means that both the sending and receiving system are set up correctly. As part of our early project work our engineers would have visited your practice to set up the new server configurations or this would be set up via your GP system supplier, which means this should already be set up in your system in preparation of this transition.

✓ But it's always good to check, below are the configuration which you will have set up in your GP system to receive electronic results. Also if you have had recent windows update make sure that that the configurations have not been disrupted.

1. RWT/Black Country Pathology Service EDI/DTS Details

Trading Partner Name	Wolverhampton New Cross Hospital BCPS
DTS Mailbox	694F0PM
Main Contact	Pathology IT
Telephone	01902307999
MEDRPT	NHS002
MEDRPT	NHS003
NHSRSR	NHS002
Trading Partner Cipher	150000058500004

2. HPV Server EDI/DTS Details

Trading Partner Name	West Midlands Cytology Service BCPS
DTS Mailbox	RL4PM001
Main Contact	Pathology IT
MEDRPT	NHS002
MEDRPT	NHS003
NHSRSR	NHS002
Telephone	01902307999
Trading Partner Cipher	150000058500006

*****Do not overwrite or delete any other DTS addresses or configurations as this prevents results from other hospital pathology departments where you send requests to being received by your practice. Both connections for RWT need to be set up; otherwise you will not receive electronic results.***

Other News

- **Electronic Ordering 'e-ordering'**

As you will be aware RWT will be transitioning to e-ordering for request HPV cervical screening tests. In preparation we are working with your GP system supplier to update your functionality in your system, thus you may start to notice a new link appear on your requesting options for HPV cervical request 'West Midlands Cytology Service BCPS'. You do not need to take any further action at this stage and can ignore this link. Please continue to request tests using the non-editable Open Exeter HMR101 form. Further information will be communicated in due course on the implementation of e-ordering in your area.

- **Communication – Do we have the correct Contact Information for your Practice?**

As practice we recognise that you are inundated with communication regarding different services and where possible we will cascade communication via your CCG on the IT changes for HPV cervical screening. However it is important for our records that we hold the correct contact information for your practice and you advise of any changes.

Accordingly please provide the following information to rwh-tr.ict-hpv@nhs.net for your practice

- Practice's Current Generic email:
- Practice Manager Name:
- Practice Manager Email:
- Practice Manager Contact Number

Secondary contact details:

- Name:
- Job Role
- Email:

Practice IT contact details

- Name:
