

Your GP practice is open... ...but working differently

GP practices are offering patients a phone or video consultation first, and will only invite patients in to the surgery if clinically necessary. Please do not attend in person unless asked to.

If you are asked to attend a practice, please ensure you wear a face covering and follow social distancing measures to help protect yourself, our staff and other patients.

Don't forget, you can download the NHS App to manage your repeat prescriptions, and you can call 119 for any COVID vaccine queries.
